Wholesale plumbing showrooms

Certified to meet EPA WaterSense® Criteria

ADA compliant

North Olmsted, Ohio... Architects and designers consistently seek fresh, modern product choices; in fact, a contemporary bathroom aesthetic is the most preferred across the country. * To fill this demand, Moen has launched the new Genta™ bathroom suite, which provides a sleek design with a dominating presence that delivers mass appeal.

“We recognize the need for more modern fixture options to satisfy designers’ desires,” said Julie Everson, wholesale bath product manager, Moen. “Genta has an impactful design while also offering a compact profile, perfect for any size bath.”

The Genta bathroom collection features curved edges with clean lines and a horizontal, flat handle that combine seamlessly for a desirable look. For added appeal, a clear, twisting water flow provides a beautiful presentation. The single-handle faucet’s lever handle features red and blue temperature indicators, a subtle detail ideal for hospitality environments.

Genta’s aesthetic extends into the shower. The suite includes tub/shower and shower-only options with a three-function showerhead and valve-only trim. And, perfectly matching accessories round out the collection, including a single robe hook, pivoting paper holder, nine-inch hand towel bar and towel bars in 18- and 24-inch lengths.

PRODUCTS IN THE GENTA BATH COLLECTION FEATURE A VARIETY OF MOEN® INNOVATIONS:

1255® Duralast® Cartridge

Single-handle lavatory faucets feature the Moen 1255® Duralast® cartridge, a state-of-the-art ceramic-disc cartridge that provides a consistently smooth handle feel and the highest levels of quality and durability for the life of the faucet.

M•PACT® Common Valve System

Moen’s common valve design allows for a quick faucet change without replacing plumbing. Simply unscrew the handles and spout, lift them out and replace with a new style – transforming the space in just minutes. It works just as easily when replacing shower trim. M•PACT® is featured on the Genta shower.

Posi-Temp® Valve

Moen pressure-balancing valves adjust automatically to changes in water line pressure – ensuring constant and comfortable water temperatures. Despite demands elsewhere in the home, the water temperature is designed to remain within $\pm 3^{\circ}\text{F}$ of the set temperature. For added safety, Moen’s temperature limit stops can be set to control maximum hot water temperature.

Each product within the Genta suite features Moen's limited lifetime warranty** to ensure superior quality.
