AVAILABILITY

- Wholesale plumbing showrooms
- Lowe's
- Menards

North Olmsted, Ohio... For even the most experienced plumbing professional, installing a sink can be an arduous and lengthy process. Tight spaces and poor visibility lead to too much time spent underneath the deck, struggling to get the sink secured just right. Moen has transformed the installation process with its QuickMount™ installation hardware. Currently available on select stainless steel drop-in sink models, QuickMount is designed to cut down sink installation time considerably.

“The QuickMount hardware is a great example of how Moen’s commitment to thoughtful design goes beyond aesthetics to incorporate installation improvements that make the homeowner or

plumber's job easier and more streamlined," said Jennifer Kacludis, wholesale sink product manager at Moen.

The QuickMount installation hardware offers a variety of features that eliminate most pain points installers experience today with drop-in sinks:

- *Less time per install:* QuickMount is designed to cut down sink installation time.
- *Less work under the sink:* QuickMount's innovative spiral shape gives installers the ability to pre-install hardware and easily place the sink into the countertop without the hardware getting in the way. Then, they can quickly and easily tighten the hardware under the sink with the provided installation tool. QuickMount clips rotate themselves into the correct position during tightening.
- *No additional tools are required:* The hardware tightens quickly and easily under the sink with the Moen® kitchen installation tool plumbers and homeowners already use and trust.
- *More installation flexibility:* The spiral mounting stud is more than 50 percent longer than traditional studs, allowing it to accommodate a wider variety of countertop depths and materials. Also, the hardware still can be placed where necessary within the channel to help reduce gaps around sink edges and adapt to countertop imperfections.

"The QuickMount hardware is incredibly easy to use," said Chris Cyphers, professional plumber at Diversified Plumbing Services. "With this tool, I was able to cut my installation time by about 50 percent. I'll definitely use this product in the future and highly recommend it to other plumbers looking to speed up the installation process."

Moen kitchen sinks with QuickMount installation hardware feature Moen's limited lifetime warranty* to ensure superior quality.
